SUMMARY

Final-year Computer Science student specializing in **Agentic AI** and backend systems. Experienced in building scalable APIs, multi-step LLM workflows, and production-ready AI applications. Proven ability to own features end-to-end in fast-paced environments.

TECHNICAL SKILLS

- **Languages:** TypeScript, Python, SQL
- **AI & ML:** Agentic AI, LLM Orchestration, LangGraph, LangChain, Tool Calling, RAG, Vector Databases, Prompt Engineering
- **Frameworks & Libraries:** Node.js, Next.js, React, Express.js, FastAPI, Socket.io, TailwindCSS, Prisma ORM
- **Databases:** PostgreSQL, MongoDB, Redis, Convex, Supabase, Pinecone, ChromaDB
- **Tools & Cloud:** Docker, AWS (EC2, S3), Git/GitHub, Inngest, Vercel, Clerk, Sentry, Postman, CI/CD
- **Concepts:** RESTful APIs, GraphQL, Microservices, Event-Driven Architecture, WebSockets, OAuth 2.0, JWT

EXPERIENCE

Backend Developer Intern | CODTECH IT Solutions, Hyderabad Jul 2025 – Aug 2025

- Designed and implemented authentication microservices using OAuth 2.0, serving 5,000+ daily active users.
- Implemented rate limiting and caching strategies using Redis to handle traffic spikes and reduce database load by 60%.
- Conducted code reviews and participated in agile sprint planning, contributing to team velocity improvements.

Open Source Contributor | Various Projects Jan 2024 – Present

- Contributed to multiple TypeScript and Python open-source projects focused on AI tooling and developer productivity.
- Actively participate in community discussions and code reviews on GitHub, with 50+ contributions across repositories.

PROJECTS

PathForge — AI-Powered Career Platform | *Next.js 15, TypeScript, Gemini AI, Drizzle ORM, PostgreSQL, Better Auth*

[Live Demo](#)

- Developed a comprehensive career guidance platform using **Next.js 15 (App Router)** and **TypeScript** to assist fresh graduates in navigating tech career paths.
- Integrated **Google Gemini AI** to build an automated Career Path Builder and Resume Analyzer, providing personalized learning roadmaps and actionable feedback.
- Architected a serverless backend using **Drizzle ORM** and **Neon PostgreSQL** for efficient data persistence and high-concurrency handling.
- Implemented a robust authentication system using **Better Auth** with Google/GitHub OAuth and an IP-based tracking system for unauthenticated free trials.

AI Interviewer Agent | *Node.js, TypeScript, LLM APIs, WebSockets, Supabase*

[Live-Demo](#)

- Built an agentic interviewer capable of conducting structured technical interviews with adaptive questioning across multiple domains.
- Implemented **multi-turn reasoning** and dynamic difficulty adjustment based on candidate responses using context-aware prompting.
- Designed session persistence and scoring logic for automated candidate evaluation with detailed feedback generation.
- Created a real-time audio/video interview interface using WebRTC and Socket.io for seamless candidate experience.
- Developed analytics dashboard to track interview metrics, question difficulty distribution, and candidate performance trends.

RAG-Based Documentation Assistant | *Python, FastAPI, LangChain, Pinecone, OpenAI*

[Live-Demo](#)

- Built an intelligent documentation search system using RAG architecture with vector embeddings and semantic search.
- Processed and indexed 10,000+ documentation pages using custom chunking strategies and metadata extraction pipelines.
- Implemented hybrid search combining vector similarity and BM25 ranking for improved retrieval accuracy by 35%.

EDUCATION

SRMS College of Engineering & Technology (CETR), Bareilly, UP

Bachelor of Technology in Computer Science

june 2022 - May 2026

CGPA: 7.5/10.0
